You're all set to start building with Llama 3.2

The models listed below are now available to you under the terms of the Llama 3.2 community license agreement. By downloading a model, you are agreeing to the terms and conditions of the License and Acceptable Use Policy and Meta's privacy policy.

MODELS AVAILABLE

With each model size, please find:

1. Pretrained weights: These are base weights that can be finetuned, domain adapted with full flexibility
2. Instruct weights: These weights are for the model that have been fine-tuned and aligned to follow instructions. They can be used as-is in chat applications or further fine tuned and aligned for specific use cases
3. Trust and safety model: Our models offer a collection of specialized models tailored to specific development needs.

Pretrained:

- Llama-3.2-1B
- Llama-3.2-3B

Fine-tuned:

- Llama-3.2-1B-Instruct
- Llama-3.2-1B-Instruct-QLORA_INT4_EO8
- Llama-3.2-1B-Instruct-SpinQuant_INT4_EO8
- Llama-3.2-3B-Instruct
- Llama-3.2-3B-Instruct-QLORA_INT4_EO8
- Llama-3.2-3B-Instruct-SpinQuant_INT4_EO8

Trust and safety models:

- Llama-Guard-3-1B
- Llama-Guard-3-1B-INT4

HOW TO DOWNLOAD THE MODEL

Visit the Llama repository in GitHub where instructions can be found in the Llama README

1. Install the Llama CLI in your preferred environment: pip install llama-stack.
2. Run llama model list to show the latest models available. For older models, run llama model list --show-all to list all available models.
3. Run llama model download --source meta --model-id MODEL_ID.
4. When the script prompts for your unique custom URL, **copy** and paste the custom URL. (Clicking on the URL itself does not access the model):

https://llama3-2-lightweight.llamameta.net/*?Policy=eyJTdGF0ZW1lbnQiOlt7InVuaXQF1ZV

K15QRJLYKIFSLZ&Download-Request-ID=637080282596219

Please save copies of the unique custom URLs provided above, they will remain valid for 48 **hours to download each model up to 5 times,** and requests can be submitted multiple times.

Now you're ready to start building with Llama 3.2.

HELPFUL TIPS:

Please read the instructions in the GitHub repo and use the provided code examples to understand how to best interact with the models. In particular, for the fine-tuned models you must use appropriate formatting and correct system/instruction tokens to get the best results from the model.

You can find additional information about how to responsibly deploy Llama models in our Responsible Use Guide.

IF YOU NEED TO REPORT ISSUES:

If you or any Llama user becomes aware of any violation of our license or acceptable use policies —or any bug or issues with Llama that could lead to any such violations—please report it through one of the following means:

- Reporting issues with the model: https://github.com/meta-llama/llama-models
- Giving feedback about potentially problematic output generated by the model: http://developers.facebook.com/llama_output_feedback
- Reporting bugs and security concerns: https://facebook.com/whitehat/info
- Reporting violations of the Acceptable Use Policy: LlamaUseReport@meta.com
